Informed Decisions, Better Results

When working with education data, it is essential to have visual analytics, data monitoring, and report generating functionality to make informed decisions based on data collected. With eScholar Analytics, dashboards are configurable, quick to implement, and easy to understand. eScholar Analytics provides visualizations for stakeholders such as guidance counselors, chief information officers, and district administrators and allows them to make informed decisions decisions regarding teaching, learning, policies, and more.

Fast Track Dashboard Design

To help kick start your agency's goals, eScholar has created a catalog of example dashboards and visualizations that your state or district can start with. Every example dashboard provides target end users, criteria, filters, and use case scenarios. eScholar Analytics dashboards and visualizations cover an array of data domains such as attendance, course and grades, assessments, staff, and discipline but can be enhanced based on your agency's needs. Get better results for your agency with informed decisions using eScholar Analytics.
